

J540 Counter Signature Pad

Eliminate the “pen and paper” associated with package pickup at your services window

When pen and ink logs become counterproductive, capture signatures electronically and bring the productivity back to your counter.

Streamline the counter delivery capability of your SendSuite™ Tracking or SendSuite™ Arrival solution by adding the Pitney Bowes J540 Counter Signature Pad. The J540 advanced electronic signature pad with backlit transfective LCD displays “electronic ink” under the pen tip during signing. The electronic signature of the recipient as well as the time and date pickup are automatically appended to the package record in your SendSuite™ solution-closing the loop and providing a complete record of activity.

Ease of use

Backlit LCD provides visibility for signer and contrast for the signature, even in low light and areas where glare can create readability issues

Rugged design

Sensors in screen are rated at 2 million signatures and the rugged tethered pen is always active and requires no batteries

Compatible with the following SendSuite™ solutions

SendSuite™ Tracking- J540
SendSuite™ Arrival- J540

SPECIFICATIONS

TECHNOLOGY

Display	Tempered Glass Backlit LCD
